

Health, Safety and Environment Policy
Garrett's Commitment to Health, Safety and the Environment

By integrating health, safety and environmental considerations into all aspects of our business, we protect our employees, our communities and the environment, achieve sustainable growth and accelerated productivity, drive compliance with all applicable regulations and develop technologies that expand the sustainable capacity of our world. Our health, safety and environmental management systems reflect our values and help us meet our business objectives.

1. We protect the safety and health of our employees, contractors and visitors through robust efforts to prevent occupational illness and injury.
2. We minimize the environmental footprint of our operations through efforts to reduce waste, increase energy and water efficiency and reduce emissions of harmful pollutants.
3. We are committed to compliance with all of our health, safety, environmental and legal requirements everywhere we operate.
4. Our commitment to health, safety and the environment is an integral aspect of our design of products, processes and services, and of the lifecycle management of our products.
5. Our management systems apply a global standard that provides protection of both human health and the environment during normal and emergency situations.
6. We are open with stakeholders and work within our communities to advance laws, regulation and practices that safeguard the public.
7. We abide by our Company's own strict standards in cases where local laws are less stringent.
8. Our senior leadership and individual employees are accountable for their role in meeting our commitments.
9. We measure and periodically review our progress and strive for continuous improvement.

These are our commitments to health, safety, and the environment everywhere we operate.
