

Hello (First Name)!

This month we welcome back Cars of Bendix with exiting coverage of All Japan Day 2019. We announce three new brake pads, eight new brake wear sensors and explore "What can be done to eliminate steering vibration under braking?" in our Bendix FAQ. Also, don't forget to see us at the 2019 AAAExpo. See below for full details on how to register your attendance!

Yours Sincerely,
The Bendix Team

CARS OF BENDIX: ALL JAPAN DAY 2019

All Japan Day in Adelaide is always a perfect day for South Australia to flaunt its impressive and diverse range of JDM cars. The event showcases everything from street to race and quite often there's a number of really nice restored and original vehicles for event goes to take a look at.

Check out our exclusive video from the All Japan Day 2019.

NEW RELEASE BULLETIN: 8 NEW BRAKE WEAR SENSORS!

Electronic Brake Wear Sensors are an added safety feature on many vehicles used to warn a vehicle's driver when their brake pads are at the end of their service life.

Electronic Brake Wear Sensors are mounted on the brake pad on any combination of the four wheels, and may have sensors on 1 to 4 corners of the vehicle.

BENDIX FAQ: WHAT CAN BE DONE TO ELIMINATE STEERING VIBRATION UNDER BRAKING?

Disc thickness variation (DTV) is the cause of this problem. Uneven rotor surfaces due to rotor run-out causes changing pressures on the brake caliper, resulting in steering vibration.
