

NEW RELEASE BULLETIN

MARCH 2019

Bendix are pleased to announce
the addition of 8 new Brake Wear
Sensors to the range!

Electronic Brake Wear Sensors are an added safety feature on many vehicles used to warn a vehicle's driver when their brake pads are at the end of their service life.

Electronic Brake Wear Sensors are mounted on the brake pad on any combination of the four wheels, and may have sensors on 1 to 4 corners of the vehicle. When the brake pad wears and the Electronic Brake wear sensor makes contact with the rotor, a warning is given, usually in the form of a light on the vehicles dashboard.

FEATURES:	BENEFITS:
SAFETY	Brake wear is monitored and warns the driver when replacement pads are needed
RELIABILITY	OE quality design
WIDE RANGE	Over 1000+ vehicle applications
